

Cobra Incident Commander Course

To get the most out of Cobra, those who lead interventions must know the possibilities that Cobra offers and when and how to use Cobra for safe and effective operations.

In the course, you will learn about how to use Cobra in a safe and effective way for different types of fires. You will also learn about Cobra tactics, the SAVE method, and effective decision-making on when to use Cobra. The aim of the course is to give Incident Commanders and other decision makers a good understanding of how to integrate Cobra into their firefighting tactics.

The Cobra Incident Commander Course is a theoretical half-day course delivered by highly experienced Cobra Senior Instructors and covers tactical training in decision-making on the use of Cobra in fire interventions.

The course may be delivered at the customer's preferred training facilities or at a Cold Cut Academy approved venue.

Cobra Incident Commander Course
